A strong majority of New Zealand voters approved the legalization of assisted suicide and euthanasia for the terminally ill on October 30. Foes of legalization said many voters appeared confused about the measure’s far-reaching effects and warned that the move will have consequences for the vulnerable. The nationwide referendum passed with support from 65% of voters. It allows terminally ill persons who are believed to have six months or fewer to live to be euthanized or to take a lethal dose of prescribed drugs themselves, on the condition that two doctors agree the person is well-informed. Patients are eligible if they show significant, ongoing decline in physical ability and experience “unbearable suffering that cannot be eased.” The law will take effect November 6, 2021 ... The New Zealand law does not require a waiting period before a lethal dose is prescribed, nor does it require a competency test. In November 2019 the New Zealand Parliament approved the bill, officially called “The End of Life Choice Bill,” by a vote of 69-51 ... Voters had to approve the act in referendum in order for it to become law. (*CNA, 10/30/20; CLR LifeWire, 11/5/20*)

Speaking up For Life

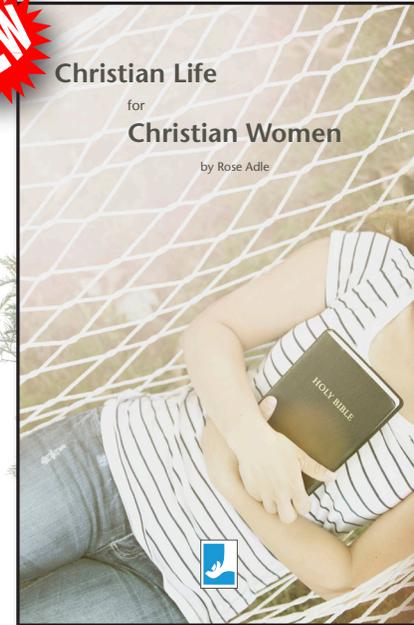

“Here is why Christmas matters ... ‘[H]e too shared in their humanity so that by his death he might destroy him who holds the power of death ...’ (Hebrews 2:14a). Imagine that. He needed a human body so it could be nailed to a cross. He needed human blood so it could be poured out as a sin offering for the world. For you. And it all started in Bethlehem. What can you say to that but ‘glory to God in the highest!’” *Pastor Mark Jeske, Time of Grace*

“The beginning of the Christmas Gospel reminds us of Mary’s condition. She is pregnant, with child ... The growth and development of a baby in the womb from just two tiny cells is a miracle ... After five weeks, the embryo is the size of a grain of rice. It has a brain and spinal cord. After six weeks, the heart is beating and you can see the eyes, ears, and head. After seven weeks, the arms, legs, and nose are visible. After eight weeks, the baby is only two centimeters long, but you can still see its fingers and toes. The perfect alignment and connection of every cell is a wondrous miracle. In the growth and development of every baby, we are participants in God’s gracious miracle of creation and new life.” *Bishop Emeritus John F. Bradosky, NALC*

Christian Life for Christian Women

Author Rose Adle: “Throughout this short booklet, let’s not lose sight of this: The place for the first lady was designed thoughtfully and with great significance and deep love. It was not an accident. It was not a mistake. There was specific, meaningful purpose infused in every fiber of womankind’s created self. The first lady to occupy the woman’s place in creation was named Eve. This first lady received her place, rejected it, and was restored to it by grace. We can relate! We’re related, after all.”
