

The Unborn are Indispensable.

Sanctity of Human Life - Begins at Conception!

Jer 1:5

"Before I formed you in the womb I knew you, and before you were born I consecrated you; I appointed you a prophet to the nations."

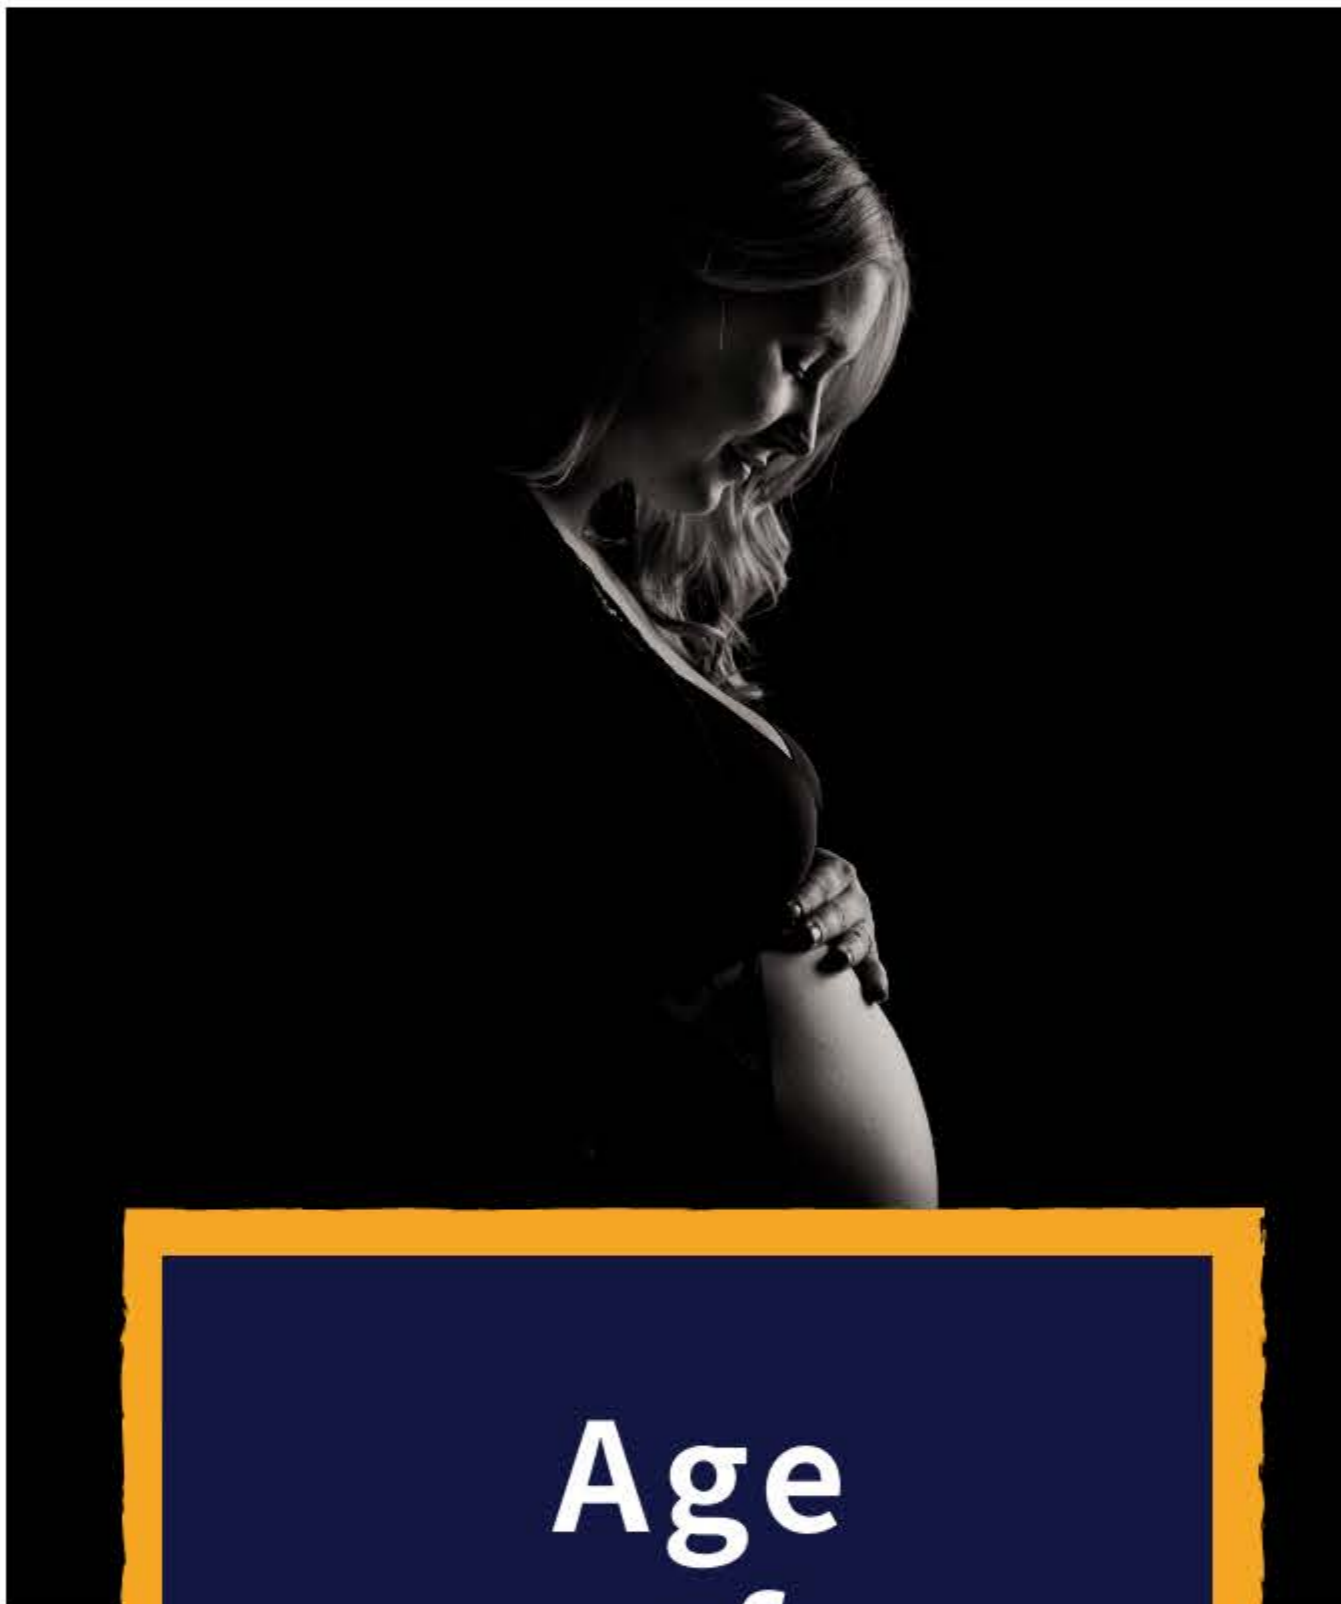

Life Issues Before Birth

Embryos (2-8 weeks after fertilization), are scientifically considered to be living and independent organisms that:

- metabolize,
- reproduce,
- react to stimuli,
- undergo respiration,
- direct their own development toward maturity,
- coordinate functions of parts for the good of the whole,
- repair damage, and
- adapt to their environment.

Facts to Know

Age of Viability

6,200 aborted babies in 2018 were past the age of viability - 21 weeks.

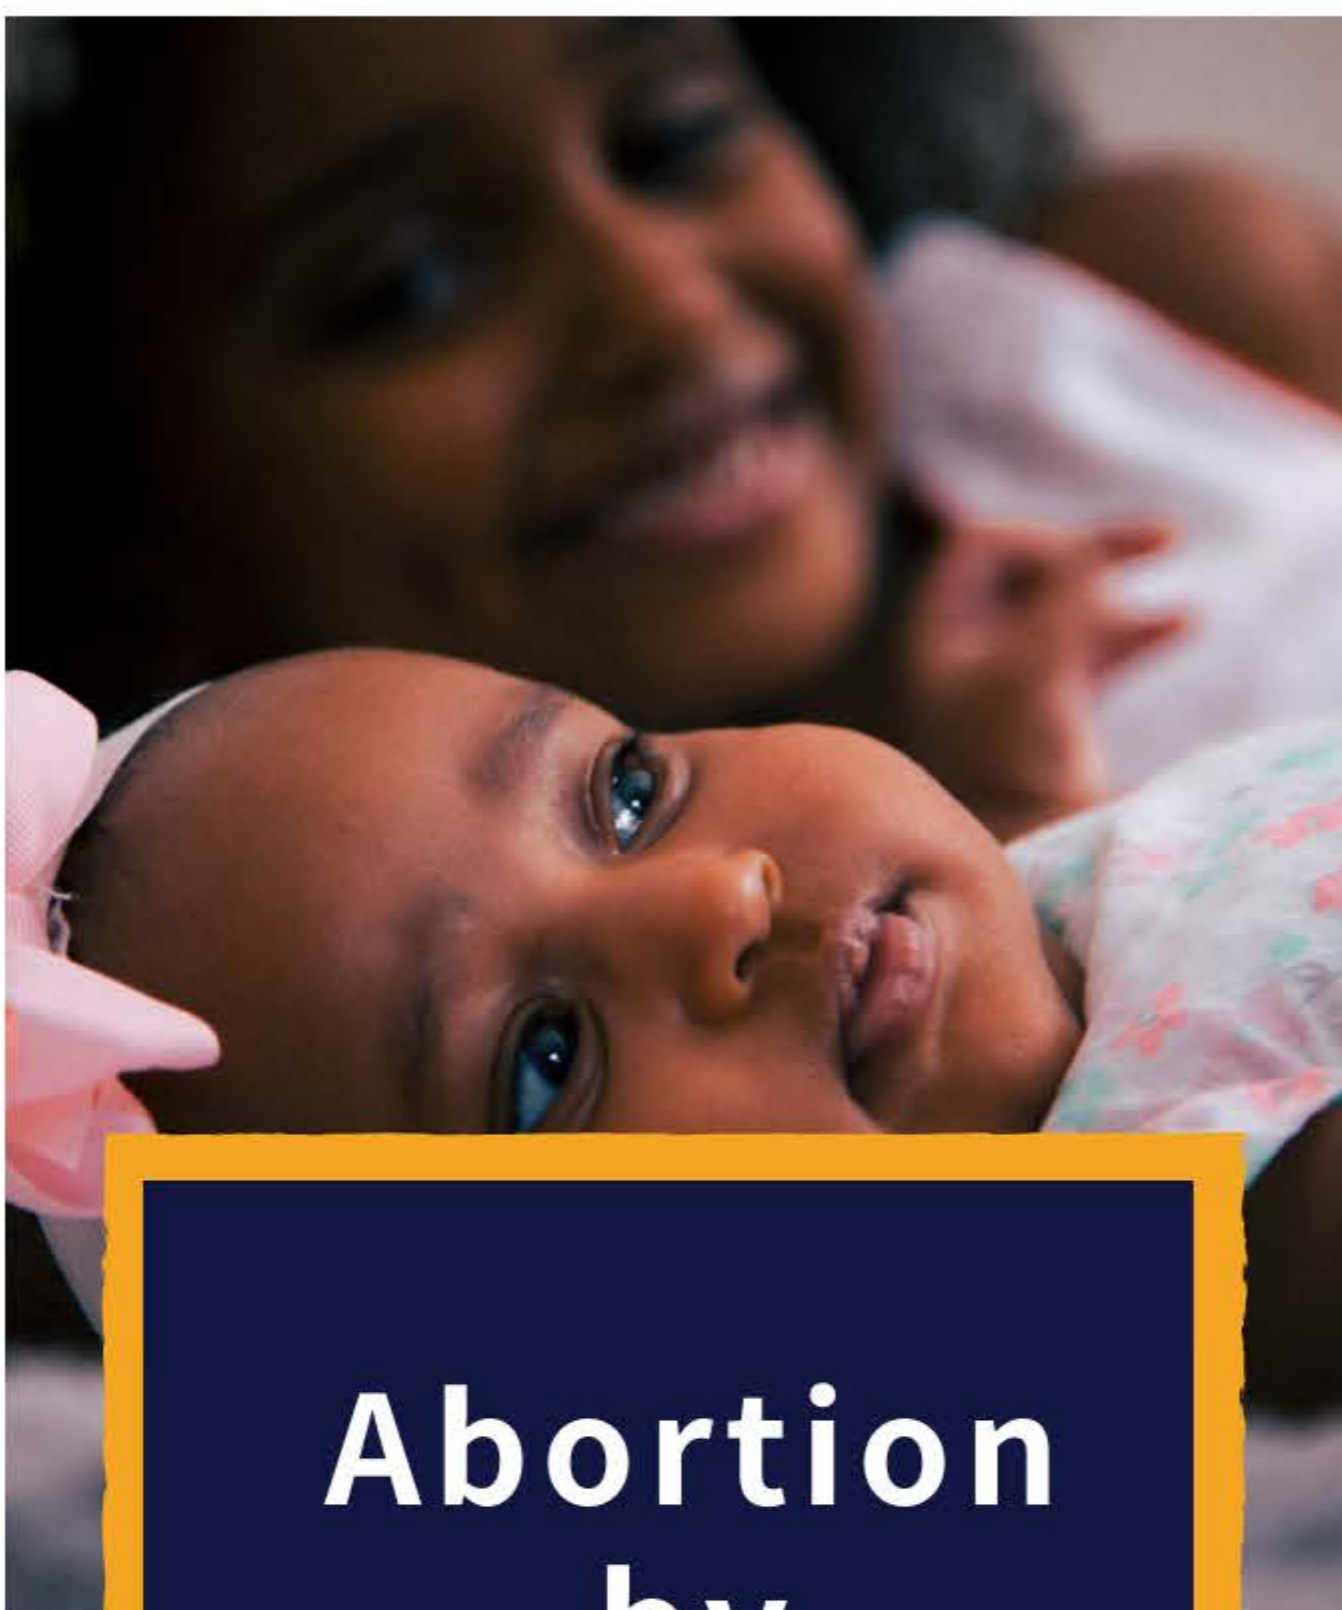

IVF

Only 7.5% of embryos fertilized during in vitro fertilization (IVF) survive until birth.

Snowflake Babies

Over 1 million frozen embryos, called "snowflake babies" are waiting to be adopted.

Abortion by Race

Of the 619,591 abortions in 2018:

- 33% White babies
- 35% Black babies
- 23% Hispanic babies
- 9% Other race/ethnicity

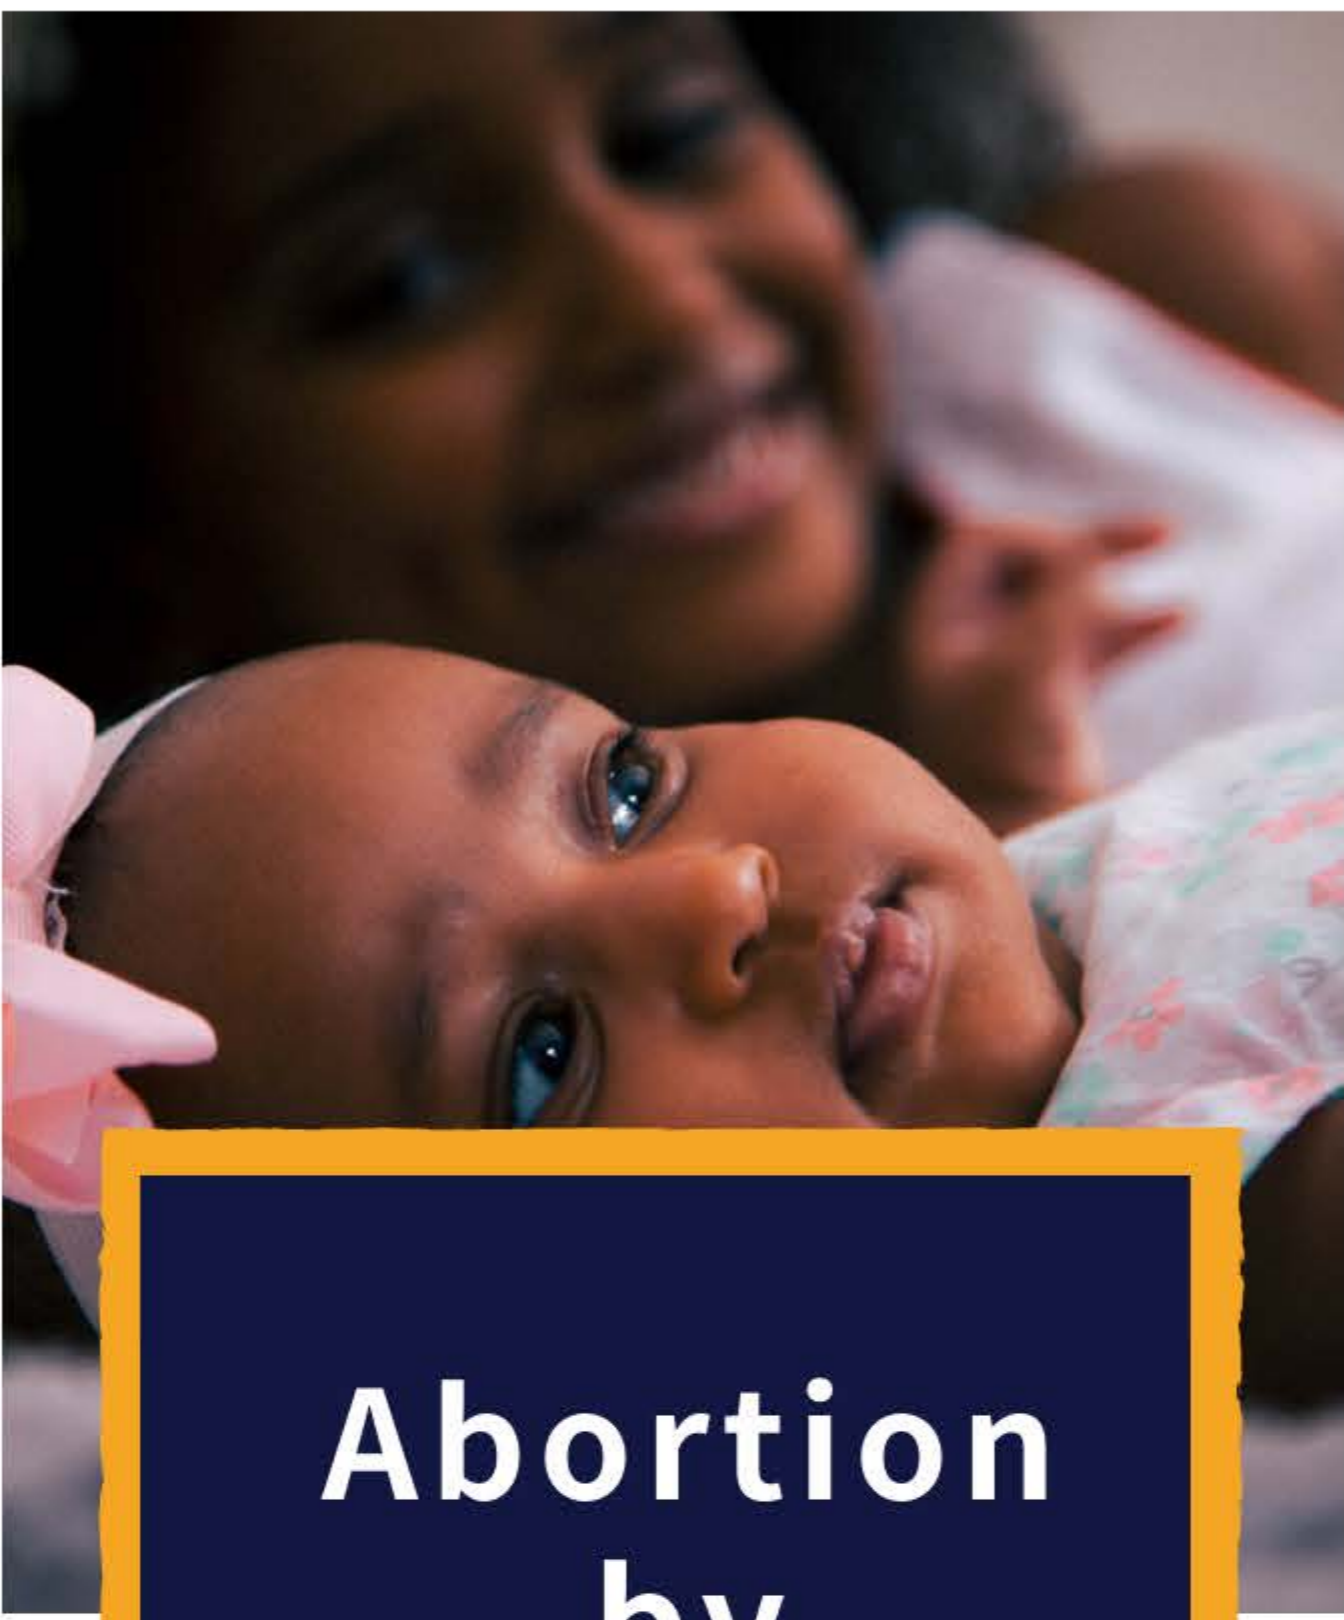

Abortifacients

Contraceptives that induce abortion include: emergency contraceptives or the "Morning After Pill," intrauterine devices (IUD), and birth control pills.

Stem Cells

Stem cells engineered from adult bodies have proven successful in medical therapies - Embryonic stem cells have not.

Abortion by Race

proven successful in
medical therapies -
Embryonic stems cells
have not.

Christian Responses

- We perceive the only differences between us and the unborn to be size, level of development, environment, and degree of dependency.
- We do not hinder children coming to the Lord, for the kingdom of heaven belongs to them.

Gal 4:4-5

But when the fulness of time had come, God sent forth his Son, born of woman, born under the law, to redeem those who were under the law, so that we might receive adoption as sons.
